JS-925 Lite-ray POS Workstation

The new Panasonic Lite-ray POS workstation is engineered to provide the features you need for virtually any application. Based on the industry leading Panasonic Stingray design, Lite-ray is durable and reliable and brings much of the functionality of higher priced systems within reach of small business operations.

The Lite-ray workstation is built for power, functionality and reliability - just what you'd expect from Panasonic, the industry leader for almost 30 years with nearly a million POS solutions placed worldwide. Lite-Ray features include:

- An adjustable 15" dual backlight, high resolution/high contrast anti-glare LCD allows for fast and accurate order taking
- Resistive touch panel is usable even when gloves are worn
- With an open architecture, Lite-ray is compatible with almost any operating system and POS software
- Powered by Intel® Atom™ the Lite-Ray is power-optimized to deliver a more robust performance per watt
- Built-in full screen rear LCD display available for promotions and improved order confirmation/accuracy
- An all-in-one fanless design with a small footprint to save counter space
- Durable and reliable even in harsh restaurant environments withstanding spills, static, dirt, shock, grease, and extreme temperatures
- Optional features include:
 - An integrated magnetic card reader (mountable in two different locations to save counter space)
 - A rear-facing 2-line vacuum fluorescent display to confirm orders
 - A second HDD with RAID 0,1 support to provide data protection and backup
 - Internal uninterrupted power supply to ensure smooth system shutdown and recovery in the event of sudden power loss
 - Security features such as fingerprint reader or Dallas Key for operator ID verification

Please see your authorized dealer for pricing details.
